GMT chapter 11 1

describing chemical pdf -

Chemical warfare (CW)

involves using the toxic

properties of chemical

substances as weapons. This

type of warfare is distinct

from nuclear warfare and

biological warfare, which

together make up NBC, the

military acronym for

nuclear, biological, and

chemical (warfare or

weapons), all of which are

considered "weapons of

mass destruction"

(WMDs). None of these fall

under the term conventional

... Chemical warfare -

Wikipedia - Tuberculosis

(TB) is an infectious

disease usually caused by

Mycobacterium

tuberculosis (MTB)

bacteria. Tuberculosis

generally affects the lungs,

but can also affect other

parts of the body. Most

infections do not have

symptoms, in which case it

is known as latent

tuberculosis. About 10% of

latent infections progress to

active disease which, if left

untreated, kills about half of

those infected.
