Mon, 26 Nov 2018 13:36:00 GMT chapter 12 dna and rna pdf - 12â€“3 RNA and Protein Synthesis For a gene to work, the genetic instructions in the DNA molecule must be decoded. The first step is to copy the DNA sequence into RNA. RNA is a molecule which contains instructions for making proteins. RNA is similar to DNA, except for three differences: â€¢ The sugar in RNA is ribose instead of deoxyribose. RNA POLYMERASE Sun, 25 Nov 2018 15:31:00 GMT DNA and RNA Chapter 12 - O'Mara's Science Site - Chapter 12 DNA and RNA To understand genetics, biologists had to learn the chemical structure of the gene. Frederick Griffith first learned that some factor from dead, disease-causing bacteria turned harmless bacteria into disease-causing ones. Griffith called this transforma-tion. Griffith thought that the transforming factor might be a gene. Thu, 29 Nov 2018 23:41:00 GMT Chapter 12 DNA and RNA
